

Katie Morag - Activity 2

Katie Morag's Island

Katie Morag lives on the island of Struay in the Western Isles of Scotland. She loves playing outside on the beaches and playing pooh sticks at the bridge over the river with her friends. Katie lives with her family above the Post Office and General Shop on the island. She can walk to Granny Island's house and sometimes helps to deliver the mail. Katie goes to a small school on the island with her friends.

Design your own island.

Can you draw or make your own island for your family clan that you would like to live on?

You could:

- Draw and colour your island on paper.
- Use materials around your house to make a 3D model of your island.

Here are some ideas to think about when drawing your island.

- Does it have a name?
- What shape is your island?
- Does it have high hills or any beaches at the sea?
- Are there any roads - how many roads?
- What buildings are there? A shop, a school, a farm, a school, a cake shop or a playground?
- What colour are the fields? Do any animals live on the Island?

Challenge - Make a key for your map. A key helps you by using symbols or colours to help explain what features are on your map like roads, rivers or big buildings.
